Jakarta, Indonesia

A graduate of SMKN 36 Jakarta (Automotive Engineering) who transitioned into the Full-Stack JavaScript field after completing vocational education. Actively building front-end and simple full-stack web applications by developing projects and attending web development bootcamps, while currently learning and practicing Node.js for back-end development. Highly interested in modern web technologies and responsive user interface development, with technical skills in HTML, CSS, JavaScript, React.js, Tailwind CSS, and Node.js.

## Work Experience

---

### Career Transition to Full-Stack Web Development

Self-Learning & Bootcamp | Jakarta, Indonesia  
2025 – Present

- Building front-end and simple full-stack web projects using HTML, CSS, JavaScript, React.js, and Tailwind CSS to strengthen practical development skills.
- Attending web development bootcamps and learning Node.js for basic back-end implementation and API handling.
- Practicing version control and project structuring using Git to simulate real-world development workflows.

## Project Experiences

---

### VideoBelajar – Harisenin Bootcamp Project

Front-End Developer | Jan, 2025 – Present

- Developing a responsive learning platform interface using HTML, CSS, JavaScript, and React.js.
- Building reusable components and structured layouts following modern front-end development practices.
- Implementing interactive features to enhance user experience.

### Todo List Web Application – Harisenin Bootcamp Project

Front-End Developer | Jan, 2025 – Present

- Developing a task management web application using HTML, CSS, and JavaScript.
- Implementing core functionalities such as adding and deleting tasks dynamically.
- Applying clean UI styling and responsive layout techniques.

### Education Level

---

SMKN 36 Jakarta – Jakarta, Indonesia

Vocational High School – Automotive Engineering  
Jul, 2023 – Jun, 2025

- Studied automotive systems, technical problem-solving, and standard workshop procedures through practical-based learning.
- Gained hands-on experience in automotive tools operation, technical documentation, and procedural compliance.
- Developed strong discipline, team collaboration, and analytical thinking through hands-on projects and workshop activities.

### Courses, Training and Certifications

---

Full-Stack Web Developer Bootcamp – Harisenin

Jakarta, Indonesia | Jan, 2025 – Present

- Attending an intensive bootcamp focused on full-stack JavaScript development.
- Building front-end and simple full-stack web applications using HTML, CSS, JavaScript, React.js, Tailwind CSS, and Node.js.
- Working on bootcamp projects to strengthen practical development skills and real-world workflows.
- Certificate: To be issued upon completion.

React JS Bootcamp – Web Programming UNPAS (WPU)

Online | Completed

- Completed a React-focused bootcamp covering React fundamentals, components, props, state, and basic hooks.
- Built small projects to reinforce understanding of React.js and front-end development concepts.
- Certificate: <https://learn.wpucourse.id/certificate/GU17BBXT>
